1 Introduction

Sports Manager Project is a turn-based sports career management simulation game. The player acts as a manager and controls a team through a full league season. During the game, the player can select a sport, create a manager profile, train the squad, choose tactics, manage substitutions, hire coaches, play matches, save progress, and continue to new seasons.

The game currently supports two sports: **Football** and **Handball**. Football uses 18 teams and 11 starting players, while Handball uses 12 teams and 7 starting players. The main goal is to manage the team successfully and finish the season as high as possible in the league standings.

2 How to Start the Game

After running the project, the player reaches the main menu screen. From this screen, the player can start a new game, load a saved game, delete an existing save slot, or exit the application.

Figure 1: Main Menu Screen
Logo Design: Ahmet Berke Gavas

3 Main Menu Screen

The main menu is the first screen of the application. It contains the main navigation buttons of the game.

Button	Function
New Game	Opens the new game setup screen. The player can create a manager, enter a team name, choose a sport, and select the league gender.
Load Saved Game	Opens a dialog that lists existing save slots. The player can select a saved game and continue from that point.
Delete Save Slot	Opens a dialog where the player can choose a save slot to delete. The deletion is permanent after confirmation.
Exit	Closes the application.

4 New Game Screen

The new game screen is used to create a new career. The screen has two main parts: manager details and match settings.

The screenshot shows a window titled "Sports Manager" with a dark green header. Below the header, the text "NEW GAME" and "Set up your team and get started" is displayed. A button labeled "← Main Menu" is in the top right corner. The screen is divided into two main sections: "MANAGER DETAILS" and "MATCH SETTINGS".

MANAGER DETAILS

- MANAGER NAME: e.g. Alex Ferguson
- TEAM NAME: e.g. Manchester United

MATCH SETTINGS

- SPORT: FOOTBALL
- LEAGUE GENDER: MALE

A green button labeled "Start Game →" is located at the bottom right of the screen.

Figure 2: New Game Screen

4.1 Manager Details

The player must fill in:

- **Manager Name:** The name of the user as the manager.
- **Team Name:** The name of the team controlled by the user.

4.2 Match Settings

The player chooses:

- **Sport:** Football or Handball.
- **League Gender:** The gender category of the league.

Button / Field	Function
Manager Name	Allows the player to enter the manager's name.
Team Name	Allows the player to enter the team name.
Sport	Lets the player choose between Football and Handball.
League Gender	Lets the player select the gender category of the league.
Start Game	Creates the new game and opens the dashboard screen. If required fields are empty, the game shows a warning.
Main Menu	Returns to the main menu without starting a game.

5 Dashboard Screen

The dashboard is the main management screen. It shows the current team, manager information, season number, reputation, current week, upcoming match, coach information, injury report if there are injured players, and a short standings preview.

Figure 3: Dashboard Screen

5.1 Dashboard Information

The dashboard displays:

- Team name
- Manager name
- Current season
- Manager reputation
- Current week and total weeks
- User team's league position
- Current coach
- This week's match
- Top part of the league standings
- Injury report if any squad member is injured

5.2 Dashboard Menu Buttons

Button	Function
Training	Opens the training screen. The player must choose training intensity before starting the weekly match flow.
Squad	Opens the squad management screen. The player can view starters, bench players, energy, condition, injuries, tactics, and substitutions.
Coach	Opens the coach management screen. The player can view the current coach and hire a new coach if unlocked.
Standings	Opens the full league table. The player can see position, played matches, wins, draws, losses, goals, goal difference, and points.
Save Game	Opens a save slot dialog and saves the current progress into the selected slot.
Delete Save	Opens a dialog to delete an existing save slot.
Main Menu	Returns to the main menu screen.

6 Training Screen

The training screen is used before each weekly match. The player selects how hard the team will train during the week.

Figure 4: Training Screen

6.1 Training Intensities

Training Type	Effect
Light	Low fatigue and small player improvement. This is safer when players have low energy.
Medium	Balanced training. It gives good improvement with moderate fatigue.
Hard	Gives bigger gains, but increases fatigue and injury risk. Risky but useful when the player wants faster development.

6.2 Training Buttons

Button	Function
Light	Selects light training intensity.
Medium	Selects medium training intensity. This is the default balanced option.
Hard	Selects hard training intensity. It has higher reward but more risk.
Done – Start Week	Applies weekly recovery, applies the selected training, starts the week, and moves to the versus screen.
Dashboard	Returns to the dashboard without starting the week.

7 Versus Screen

The versus screen appears before the match setup. It shows the home team and away team with an animated match introduction.

Figure 5: Versus Screen

Button	Function
Kick Off	Opens the pre-match screen where the player can choose tactic and review the squad before starting the match.

8 Pre-Match Screen

The pre-match screen is shown before the first half begins. The player can check the match, select a tactic, and review the squad.

Figure 6: Pre-Match Screen Versus Screen

8.1 Tactic Options

Tactic	Meaning
Defensive	Focuses more on defense. Useful when the opponent is stronger or when protecting a result.
Balanced	A neutral tactic between attack and defense. Safe choice for most matches.
Offensive	Focuses more on attacking. Useful when the player wants to score more, but it may be riskier defensively.

8.2 Pre-Match Button

Button / Field	Function
Tactic ComboBox	Lets the player choose Defensive, Balanced, or Offensive tactic before the match starts.
Start Match	Saves the selected tactic, plays the first period, and opens the match screen.

9 Match Screen

The match screen shows the live score after the first half. It also displays squad status, energy, condition, and injuries.

Figure 7: Match Screen

Button	Function
Half Time Substitution Tactic	Opens the half-time screen. The player can change tactic and make substitutions before the second half.
Play 2nd Half Directly	Skips half-time management and immediately plays the second half. After that, the game opens the post-match result screen.

10 Half-Time Screen

The half-time screen allows the player to react to the first half result. This is where the player can change the tactic and substitute players before the second half.

Figure 8: Half-Time Screen

10.1 Half-Time Features

- Shows the current half-time score.
- Shows injury information.
- Allows tactic change.
- Allows player substitution.
- Shows squad status with energy and condition bars.

Button / Field	Function
Defensive / Balanced / Offensive	Radio buttons used to change the team tactic before the second half.
Player Out	Selects the starting player who will leave the match. Injured players are shown clearly.
Player In	Selects the bench player who will enter the match. Healthy bench players are easier to choose first.
Substitute	Applies the selected substitution. If both players are not selected, the game shows a warning.
Continue to 2nd Half	Saves the selected tactic, plays the second half, and opens the post-match screen.

11 Post-Match Screen

The post-match screen appears after the match is finished. It shows whether the player won, drew, or lost the match.

Figure 9: Post-Match Screen

11.1 Result Types

- **Victory:** The user's team scored more goals than the opponent.
- **Draw:** Both teams scored the same number of goals.
- **Defeat:** The user's team scored fewer goals than the opponent.

Button	Function
Next Week	Submits the match result. If the season is not finished, it returns to the dashboard for the next week. If the season is complete, it opens the season end screen.

12 Squad Management Screen

The squad management screen allows the player to review and manage the squad. It shows starting players and bench players separately.

Figure 10: Squad Management Screen

12.1 Squad Information

Each player row shows:

- Player name
- Energy value
- Condition value
- Injury status if the player is injured

12.2 Squad Buttons and Fields

Button / Field	Function
Tactic ComboBox	Changes the current team tactic. The player can choose Defensive, Balanced, or Offensive.
Player Out	Selects a player from the starting lineup to be substituted out.
Player In	Selects a player from the bench to be substituted in.
Make Substitution	Swaps the selected starter with the selected bench player. If selection is missing, the game shows a warning.
Dashboard	Returns to the dashboard screen.

13 Coach Management Screen

The coach management screen allows the player to view the current coach and hire a new coach.

Figure 11: Coach Management Screen

13.1 Coach Information

The current coach card displays:

- Coach name
- Coach level
- Training boost

- Energy save
- Match bonus
- Relationship score

13.2 Coach Table

The coach table shows all available coaches. Some coaches may be locked depending on season and reputation requirements.

Button / Label	Function
Hire	Hires the selected available coach and updates the current coach.
Active	Shows the coach currently assigned to the user's team.
Locked	Shows that the coach cannot be hired yet because requirements are not met.
Dashboard	Returns to the dashboard screen.

14 Standings Screen

The standings screen shows the full league table. It helps the player track the season progress and compare the team with other teams.

STANDINGS GREAT

POSITION 13 SEASON 1

POS	TEAM	P	W	D	L	GF	GA	GD	PTS
1	Hajduk Split	1	1	0	0	9	3	6	3
2	Maribor	1	1	0	0	9	6	3	3
3	Universitatea Craiova	1	1	0	0	3	0	3	3
4	Al Ahly	1	1	0	0	7	5	2	3
5	Partizan	1	1	0	0	4	3	1	3
6	Esteghlal	1	1	0	0	3	2	1	3
7	Panathinaikos	1	1	0	0	1	0	1	3
8	Anderlecht	1	0	1	0	0	0	0	1
9	Johor Darul Ta'zim	1	0	1	0	0	0	0	1
10	Olimpija Ljubljana	1	0	1	0	0	0	0	1
11	Vardar Skopje	1	0	1	0	0	0	0	1
12	Rapid Vienna	1	0	0	1	3	4	-1	0
13	great	1	0	0	1	2	3	-1	0
14	Sporting CP	1	0	0	1	0	1	-1	0
15	Real Madrid	1	0	0	1	5	7	-2	0
16	Lech Poznan	1	0	0	1	6	9	-3	0
17	PAOK	1	0	0	1	0	3	-3	0
18	Valencia CF	1	0	0	1	2	6	-4	0

← BACK TO DASHBOARD

Figure 12: Standings Screen

14.1 Standings Columns

Column	Meaning
POS	Team position in the league.
TEAM	Team name.
P	Number of played matches.
W	Number of wins.
D	Number of draws.
L	Number of losses.
GF	Goals scored by the team.
GA	Goals conceded by the team.
GD	Goal difference.
PTS	Total points.

Button	Function
Back to Dashboard	Returns to the dashboard screen.

15 Save and Load System

The game supports multiple save slots. This allows the player to save progress and continue later.

15.1 Saving the Game

The player can save the game from the dashboard by clicking **Save Game**. A dialog appears and the player selects a save slot. After selecting the slot, the game saves the current progress.

Figure 13: Save Game Dialog

15.2 Loading the Game

The player can load a saved game from the main menu by clicking **Load Saved Game**. The game lists existing save files. After selecting a save, the game opens the dashboard and continues from the saved progress.

Figure 14: Load Saved Game Dialog

15.3 Deleting a Save

The player can delete a save from the main menu or dashboard. The game asks for confirmation before deleting the selected slot.

Figure 15: Delete Save Dialog

16 Season End Screen

When all weekly matches are completed, the game opens the season end screen. This screen shows the season champion and the final top standings.

Figure 16: Season End Screen

Button	Function
New Season	Starts a new season and returns to the dashboard.
Save & Exit	Opens a save slot dialog, saves the game, and returns to the main menu.
Exit	Closes the application.

17 How to Play: Step-by-Step

1. Open the application.
2. Click **New Game**.
3. Enter the manager name and team name.
4. Select **Football** or **Handball**.
5. Select the league gender.
6. Click **Start Game**.
7. On the dashboard, check the upcoming match and team status.
8. Click **Training**.

9. Choose Light, Medium, or Hard training.
10. Click **Done – Start Week**.
11. On the versus screen, click **Kick Off**.
12. On the pre-match screen, choose a tactic and click **Start Match**.
13. After the first half, either:
 - click **Half Time – Substitution / Tactic** to make changes, or
 - click **Play 2nd Half Directly** to continue immediately.
14. After the match, click **Next Week**.
15. Repeat this process until the season ends.
16. At the end of the season, choose **New Season**, **Save & Exit**, or **Exit**.

18 Gameplay Tips

- Use **Hard Training** carefully. It gives better improvement but can reduce energy and increase injury risk.
- Check the **Squad** screen regularly, especially when players are injured.
- Use **Defensive** tactic against stronger opponents.
- Use **Offensive** tactic when you need to score.
- Hire better coaches when your reputation and season progress allow it.
- Save the game regularly to avoid losing progress.
- Monitor the standings to understand your league position and title race.

19 Conclusion

This user manual explains the main screens, buttons, and gameplay flow of the Sports Manager Project. The player manages a team across weekly matches by controlling training, tactics, squad substitutions, coaching, and save/load decisions. The main objective is to guide the team through the season and achieve the best possible league position.
